Dataset License Certificate

FishEye8K and FishEye1Keval: Benchmarks for Road Object Detection Task

Dataset Provider:

This certificate is issued by the provider of the FishEy and FishEye1Keval datasets.

Dataset Description:

The FishEye8K dataset is designed for road object detection tasks using fisheye lens cameras. It comprises 8,000 images recorded in 22 videos using 18 fisheye cameras, with annotations for traffic monitoring in Hsinchu, Taiwan.

Similarly, the FishEye1Keval dataset comprises of 1000 images collected from 11 different cameras which were not used in the FishEye8K dataset. Both datasets have 5 road object classes, namely, "person", "bike", "car", "truck", and "bus".
